YOUNG & THOMPSON 745 SOUTH 23RD STREET 2ND FLOOR ARLINGTON, VA 22202			EXAMINER IRVIN, THOMAS W	
			ART UNIT 3683	PAPER NUMBER
			MAIL DATE 11/16/2007	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/538,932	Applicant(s) VAN DER LEEST ET AL.	
	Examiner Thomas W. Irvin	Art Unit 3683	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 6-13 is/are pending in the application.
 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 6-13 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 10 December 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Objections

Claims 6 and 7 are objected to because of the following informalities: Claim 6 is objected to because it includes a reference characters "□" and "44" which are not supported in the drawings. Claim 7 contains the reference character "a" which is not supported in the drawings. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 6-13 are rejected under 35 U.S.C. 102 (e) as being anticipated by Brandsma et al. (2003/0144097).

In Re claim 6, with reference to Fig. 1, 3, 4A, 4B, 5A, and 5B, '097 disclose a continuously variable transmission (1) provided with: a primary pulley (2); a secondary pulley (3); a drive belt (10), clamped between two conical pulley discs (21, 22; 31, 32) of the respective pulley (2; 3); a running surface of the pulley discs in contact with the drive belt (10), the surface, as seen in a cross section oriented perpendicular to a tangential

direction, having a curvature so that a pulley angle (β) varies between the base of the pulley disc and the outer most portion of the pulley disc, such that the outer most angle defines a highest value, and the angle of the pulley disc at the base of the pulley disc defines a lowest value, characterized in that the curvature of the running surface of the primary pulley and the curvature of the running surface of the secondary pulley differ from one another, when the primary pulley and the secondary pulley are operating at different effective diameters, as shown in Fig. 3, and when the primary pulley is operating at a larger effective diameter than the secondary pulley, the highest value for the pulley angle of the secondary pulley is lower than the pulley angle of the primary pulley.

In Re claim 7, a range between the highest value and the lowest value for the pulley angle of the secondary pulley is smaller than a corresponding range of the pulley angle of the primary pulley when the primary pulley is operating at a larger effective diameter than the secondary pulley.

In Re claims 8 and 9, the lowest value of the pulley angle for both the primary and secondary pulley discs are equal to each other, in that the curvature of the primary and secondary pulley discs is substantially equal to the initial angle of the pulley discs.

In Re claims 10-13, '097 disclose that the continuously variable transmission is intended for use on a motor vehicle.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number:
10/538,932
Art Unit: 3683
